A Universe of Engineering

A Universe of Engineering

History & Values

History

SARRALLE is a private company founded in 1965 in Azpeitia (Spain) with two business lines, the steel industry and the workshop & storage systems sector.

Nowadays with an extensive experience of over 50 years in international projects, SARRALLE is a consolidated Industrial Engineering company offering cutting-edge tailored solutions to our customers worldwide in the Environmental, Energy and Steel areas.

Sarralle is an innovative Engineering, Procurement and Construction provider company, with more than 400 dynamic, highly-qualified and multicultural employees and located in 7 countries. Our unique expertise, technological capabilities and group synergies will help our customers to create smart ways of meeting today's challenges.

Corporate Values

Sarralle's main corporate value is the close collaborations with our customers to achieve the best tailored solutions for them. We listen their needs and requirements, choose the best technological solutions suited to their targets and we support and work with them during the entire project, from the initial designing phase to the final training of their staff. Engineering, Group, International, Turnkey Projects, Technology, Innovation, Know-How, Flexibility, Responsiveness and Service. This is Sarralle.

Solutions & Services

Engineering & Design

With more than 50 years of experience, SARRALLE offers Design & Engineering services working continuously to improve process and products as well as tailor made solutions and services. More than 50 years at service of different sectors, is giving us the privilege to understand your needs in advance, driving the markets trends with new solutions, process improvement and efficiency.

SARRALLE provides you the entire range of project engineering from conceptual and detailed design to construction and start-up engineering :

- Layout studies
- Civil engineering and structures
- Mechanical engineering
- Piping engineering
- Process engineering
- 3D Scanning of existing equipment
- 3D Designing of the equipment and installation

Solutions & Services

Electric & Automation

SARRALLE provides comprehensive solutions for all technological control systems as well as complete automation such as:

- Sub-Stations
- Automation configuration.
- Design and testing of Level I & II applications
- Programming with several types of hardware (Siemens, Allen Bradley and others)
- Customized services with HMI pages in any required language
- Online, direct Customer Service
- On-site commissioning of equipment
- Dedicated Training for all solutions

The careful selection of the components and the optimized configuration of the automation package provided by SARRALLE allows our Customers to obtain the following advantages:

- Reduction in the amount of hardware required.
- User friendly interface with the HMI and higher level control systems
- High speed troubleshooting and fault detection, easy maintenance, high level of efficiency, energy saving.

Solutions & Services

Manufacturing Facilities

SARRALLE manufactures cutting-edge equipment designed by our engineers in our own workshops. A committed team of specialists assures that the manufacturing process follows the highest standards our customers expect from our equipment. We strongly believe that control of the manufacturing process is the best way to obtain the necessary flexibility that tailor-made solutions require and to guarantee high quality standards and fast delivery of the goods.

Sarralle is a global company that counts with different workshops in the world to be able to offer a local service, remaining competitive in costs and working closely to our customer. Our own workshops enable us to provide our customers with the flexibility and quality they require.

Erection & Commissioning

SARRALLE offers the best service for the erection, site assembly and commissioning of all SARRALLE products. We possess the know how and references to prepare your plant to perform at its best, from de civil works to the commissioning of all the equipment and installations.

Solutions & Services

Turnkey Solutions

With decades of experience in the steel industry, SARRALLE aims at supporting customers all along every step of the project: from the offer, through technical, commercial, erection and commissioning phases.

Our Team guarantees a high level of know how assistance and management quality, paying constant attention to the present and future relationship with customers.

SARRALLE is proficient at managing every aspect of your project and handle everything from engineering, permitting, procurement to full construction. SARRALLE will ensure your installation is finished on time and within budget.

We offer you:

- Planning
- Engineering
- Project management
- Manufacturing
- Erection
- Commissioning
- Supervision services
- Staff Training
- After sales service

Solutions & Services

Consulting Services

SARRALLE provides a complete range of services such as:

- Technological support for quality and productivity improvement.
- Technical consultancy for mechanical trouble check.
- Metallurgical assistance
- Supervision and commissioning services
- Maintenance Management Support

Quality and productivity requirements, as well as cost reduction and flexibility, are a must in modern Industry. Problems related to the process, equipment misuse or deficiencies, personnel training, maintenance, are producing unexpected equipment stoppage or product rejection, with cost increase and loss of competitiveness.

SARRALLE Consulting Services is the right solution for your requests: thanks to our long lasting experience, we can provide you suitable solutions covering all aspects of your activity.

Technology & Innovation

We are fully committed with innovation and technology, our main challenge in the upcoming years is to offer our customers the custom-tailored smart plants of the future, where all components work in harmony to achieve cost and time efficiency, process optimization and enhance decision making to manufacture the highest quality products.

Connected, intelligent, flexible, automated, conducive to health & safety, and environmentally friendly, this is the new age of industrial plants Sarralle offers you.

Spare Parts

SARRALLE works for the lifecycle of your plant. Your productivity and competitiveness is our aim. That's why in SARRALLE we keep a backup inventory of the components you need for your plant so that we can deliver them fast and easily for you.

Solutions & Services

Upgrade & Modernizations

SARRALLE is your partner to revamp and upgrade your plant and equipment. We help you to keep your position on the market or make it stronger working in the modernization of your process, equipment and installations. We help you to improve productivity and product quality with our services, offering you tailor made solutions able to maximize the efficiency of the plant and the profitability after a minimized investment.

Greenfield Projects

Sarralle is able to manage any type of project, starting from engineering and procurement, through construction and full turn-key supply. Intragrating all technologies to optimize the project in cost and time.

Maintenance & Repairs

We care for your plant and equipment to assurance your productivity. Our service experts will offer you equipment checked, continuous condition monitoring, and emergency support, all you need to your plant lifecycle.
